The Memory Clinic team comprehensively evaluates persons with concern for memory loss or established dementia. the team works with you and your support system to identify what matters most and to tailor a care plan that supports an improved quality of life. Some care plan areas may include:

- Optimizing independence;
- Identifying person-specific strategies to slow cognitive loss and functional decline;
- Creating safe home environments and optimizing safe mobility within your community;
- Performing a comprehensive review of medications that may increase the risk of poor cognitive functioning or undesirable outcomes;
- Developing care plans for behavioral changes associated with dementia;
- Supporting patients and caregivers across the continuum of life with memory disorders;
- Planning for future health care decisions through advance care planning.

Our aim is to provide resources and interventions that promote improvements in cognition and longevity through a combination of pharmacological and non-pharmacological approaches.

While a parking garage is available, arriving by Metro is recommended. The Foggy Bottom Metro station on the Orange, Blue, and Silver lines is within walking distance of our downtown locations. Metro Access or taxis are other transportation options.
