## Vaccines for Everyone

### **Vaccines for you and your family**

Vaccination is one of the best things you can do to help protect yourself and your family from serious diseases. Stay up to date on getting recommended vaccines for you and your family. Routine vaccination is important for people of all ages.

### **Vaccines across the lifespan**

As your children head back to school this fall, it's particularly important for you to work with your child's doctor or nurse to make sure they get caught up on missed well-child visits and recommended vaccines.

Adults also need to stay up to date on vaccines. Remember to take care of yourself too! Make sure to receive any vaccines you need to stay healthy. Use CDC's [adult vaccine assessment tool](#) to see which vaccines might be right for you.

### **COVID-19 Vaccination**

On June 27, 2024, the CDC Director adopted the ACIP's recommendations for use of 2024-2025 COVID-19 vaccines in people ages 6 months and older as approved or authorized by FDA. The 2024-2025 vaccines are expected to be available in fall 2024. This page will be updated at that time to align with the new recommendations.
