Many newer technologies can greatly help you connect with your friends, family, and the community. For example, devices and applications exist that help alleviate anxiety, communicate with loved ones, and make things like shopping and home security easier. Learn more about these helpful items and how they can support you in being socially connected. For no cost, the friendly staff at Virginia Assistive Technology Systems (VATS) can help you learn about the range of available technology, select the most appropriate devices for your lifestyle, and receive training on how to use the selected device.
