Sheltering Arms Post-COVID-19 Recovery and Rehabilitative Care Center s an outpatient rehabilitation program dedicated to meeting the needs of people who have survived COVID-19 and are experiencing lasting symptoms related to the virus. Some people may have been hospitalized or admitted to intensive care and are experiencing impairments related to mobility, cognition, and/or daily living. Many people who were never hospitalized may also experience impairments with shortness of breath, fatigue, or difficulty with memory and attention that may benefit from this program as well.

This program includes physical therapy, occupational therapy, and speech therapy services. Patients will be evaluated for additional needs as appropriate.

Post-COVID-19 services are offered both in-person at our Hanover and Bon Air outpatient clinics and via Telehealth. Specific therapists have been trained with additional education to best meet the needs of these patients. Visit the website for more information and to complete an [online appointment form](#).
